

Quick actions for your MP

We want all politicians to understand the importance of dementia research to provide hope for people living with dementia today and in the future.

Here are some simple things you can ask your MP to do to start engaging with dementia research:

- View our [resources for MPs and Peers](#) and learn how to support people with dementia and dementia research in the UK.
- Put themselves in the shoes of someone living with dementia with our virtual reality app “[A Walk Through Dementia](#)”
- Visit the research section of our website to [find out more about the projects we fund](#).
- Contact us at policy@alzheimersresearchuk.org to arrange a bespoke constituency event or to tour a local research lab to raise awareness.
- Help constituents better understand what research means for them and how they can get involved, by sharing information about [Join Dementia Research](#).
- Follow Alzheimer’s Research UK on our social media: [Facebook](#), [Twitter](#) and [YouTube](#).

If you have any questions about campaigning or how you can make a difference, please email us at policy@alzheimersresearchuk.org
